Data Analyst and Business Intelligence professional with 3+ years of experience in Power BI, SQL, Excel, Tableau, and Python. Skilled in dashboard development, reporting automation, ETL workflows, KPI reporting, DAX, Power Query (M Language), and data analysis. Experienced in building interactive dashboards, analyzing large datasets, and delivering actionable business insights to support operational efficiency and data-driven decision-making.

TECHNICAL SKILLS

BI & Visualization: Power BI Desktop, Power BI Service, Tableau, Looker Studio, Dashboard Development, KPI Reporting
Analytics & Querying: SQL (MySQL, PostgreSQL), Trend Analysis, Data Exploration, Data Analysis, Business Intelligence
Advanced Excel: Excel VBA, Excel Macros, VLOOKUP, Pivot Tables, Lookup Functions, Reporting Automation, Data Cleaning
Power Platform: DAX, Power Query (M Language), DAX Studio, Power Automate
Programming & Data: Python (Pandas, NumPy, Matplotlib, Scikit-learn), ETL Pipelines, STAR Schema, Data Modeling
Business Skills: Stakeholder Management, Business Analysis, Process Optimization, Data Quality Management

PROFESSIONAL EXPERIENCE

Data Analytics Intern (Business Intelligence) — Labmentix Pvt. Ltd.

Sept 2025 – March 2026

- Built interactive dashboards and reporting solutions using Power BI, SQL, and Excel resulting in improved reporting visibility and stakeholder decision-making.
- Performed data cleaning, transformation, exploratory analysis, and trend analysis resulting in actionable business insights and improved reporting accuracy.
- Supported reporting automation and data exploration activities using SQL, Power Query, and Excel workflows reducing manual reporting effort.

Data Analyst — Wipro Technologies, Bhubaneswar

May 2022 – Sept 2025

- Achieved 35% faster business reporting by developing and maintaining 15+ Power BI dashboards integrating ERP, CRM, sales, and operational datasets resulting in improved executive decision-making and KPI visibility.
- Achieved 40% reduction in manual reporting effort by automating ETL pipelines, dashboard reporting, and data transformation workflows using SQL, Power Query (M Language), Excel VBA, and DAX resulting in improved reporting efficiency and scalability.
- Achieved improved reporting accuracy and operational visibility by performing data validation, trend analysis, data exploration, and troubleshooting reporting outliers across 500K+ business records.
- Delivered actionable insights and business recommendations through profitability analysis, operational reporting, KPI monitoring, and trend analysis supporting business optimization.
- Collaborated with leadership teams, business users, and stakeholders to define reporting requirements, resolve reporting issues, and deliver business intelligence solutions.
- Supported dashboard implementation, reporting automation, and business intelligence initiatives resulting in streamlined workflows and improved reporting reliability.

PROJECTS

Inventory & Supplier Performance Analytics — Power BI, SQL, DAX

Built interactive dashboard analyzing inventory turnover, supplier performance, replenishment trends, and operational KPIs supporting reporting automation and business insights.

Sales & Profitability Analytics Dashboard — Power BI, SQL, DAX

Created executive dashboard tracking revenue, profitability, YoY growth, and regional KPIs using advanced DAX calculations and SQL-based reporting workflows.

Blinkit Operations Analytics Dashboard — Power BI, SQL, DAX

Developed operational dashboard tracking order fulfillment, delivery performance, inventory trends, and regional KPIs resulting in improved operational monitoring.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)

2019 – 2022

C. M. College, Darbhanga

73.52%

Certifications: Power BI Data Analytics Certification – IIPCL (74%) | Python for Data Analysis | Advanced Data Analytics Assessment – Learntube (100%)
